

# Team Work Challenge

## Teacher Mission Report

So, you've been taking your team of students on an exciting robotics challenge! Now it's time to report back!

All we request is a 400-word report (or more) to summarise the impact of the Tomorrow's Engineers EEP Robotics Challenge on your students.

We have some teacher prizes to present at competitions. By emailing your report before your competition day, you will be entered into a draw for a prize!

### Report outline

#### 1. Context of the group:

- How was the group chosen? Where appropriate, did you use any specific criteria (eg: G&T, underachieving, age, gender, etc) for choosing the students involved or were they all volunteers?
- Were there any challenges in forming the group?
- In general, how often did the group work together on the project?

#### 2. Challenges students have faced and overcome:

- Were there any specific issues or problems that students tackled?
- How did they overcome any barriers that stood in their way?
- What did 'success' look like for your students?

#### 3. Impact

- What impact has this project had on individuals in your group – are there any specific 'success' stories?

#### 4. You!

- How has working on this project impacted on you as a practitioner?

#### 5. Us!

- What could we do next year to make the robotics challenge even better?
